

ACCESSORIES

Mobile Fill Wireless

- Ergonomic
- Convenience
- Time saving

The flexible, mobile and ergonomic solution is ideal to be positioned anywhere you want. This wireless version perfectly supplies several packing tables.

Do you need to have air cushions available at different packing stations? This is a bin on wheels, with a MINI PAK'R attached that is battery driven.

Just wheel the Mobile Fill Wireless anywhere you need it while producing air cushions. The machine automatically replenishes the bin with air cushions, so that you will always have them to hand.

Benefits

Ergonomic

The film is presented on the packing table, with the sliding arm above the bin. The packager does not have to bend down to pick up the air cushions. It eliminates the risk of injury.

Convenience

This Mobile Fill Wireless allow packers to have air cushions wherever they need. The sensor in the bin ensures that the cushions are automatically filled.

Time Saving

The packagers no longer have to fetch the bins from elsewhere, and they can change the rolls quickly. This way they can stay focussed on packing.

Characteristics

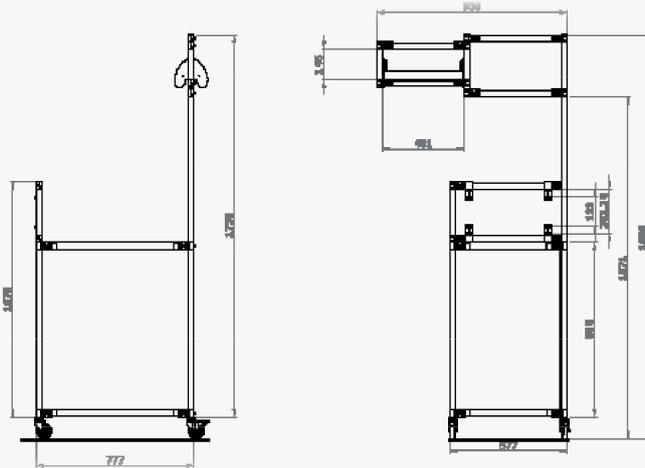

- Robust and mobile, perfect for a logistic environment
- Ergonomic and flexible
- Sensor-controlled production
- Runs on battery
