

ACCESSORIES

Mobile Fill

- Convenience
- Ergonomic
- Time saving

The flexible, mobile and ergonomic solution which is ideal for positioning between packing tables.

Do you need to have air cushions available at different packing stations? This is a bin on wheels, with a MINI PAK'R or PRO PAK'R attached.

Just wheel the Mobile Fill anywhere you need it. The machine automatically replenishes the bin with air cushions, so that you will always have them to hand.

Benefits

Ergonomic

The film is presented on the packing table, with the sliding arm above the bin. The packer does not have to bend down to pick up the air cushions. It eliminates the risk of injury.

Convenience

The sensor in the bin ensures that the cushions are automatically filled.

Time Saving

The packers no longer have to fetch the bins from elsewhere, and they can change the rolls quickly. This way they can stay focussed on packing.

Flexibility

Simple operation, light rolls, mobile set up, easy lifting.

Characteristics

- Robust and mobile, perfect for a logistic environment
- Ergonomic and flexible
- Sensor-controlled production

Specifications

PRO PAK'R Mobile Fill

- Dimensions bin (WxLxH): 780x1000x1850 mm
- Volume bin: 0,7 m³
- Volume bin 2/3 filled: 0,46 m³

Machines

The PRO PAK'R is equipped with the latest technology. It is fast, smart, easy to use and is very compact. It also works with a variety of films.

The MINI PAK'R INDUSTRIAL is specially designed for areas where space is critical. It's a welcome addition to warehouses and distribution centres with multiple packing tables.

The MINI PAK'R V3 has a new seal technology that ensures even higher reliability and lower maintenance. Also, the machine is suitable for a wider range of films including our new sustainable film.
