AirSpeed® MINI PAK'R® V3

Renew™ 200x130

- Contains 50% Post-consumer recycled (PCR) content
- 100% recyclable

These AirSpeed Renew air bags are created out of 50% Post-consumer recycled content. We strive for a circular economy and this recycled content embodies this. It is made from products that served end-users, after which it has been recycled. It is sustainable and circular... the print included! This is printed on each air cushion with a water-based ink, so it's not harmful to the environment.

- Size cushion: WxL = 200x130 mm
- Thickness: 19 micron
- Material: LDPE
- Complies with EN13427 standard for packaging and packaging waste
- Product code: 4079601

## Machine & Accessories

The **MINI PAK'R V3** is a compact and versatile machine producing air cushion on-demand. Compatible with Integrated Systems and a large range of accessories, the machine is the right solution for warehouses and distribution centers with multiple packing tables. Using RFID, the film settings are automatically selected, which make the machine easy to use.

AirSpeed® MINI PAK'R® V3

## Renew™ Double Cushion

- Contains 30% Post-consumer recycled (PCR) content
- Multi purpose cushion

These AirSpeed Renew air bags are created out of 30% Post-consumer recycled content. It is made from products that served end-users, after which it has been recycled. The Renew Double Cushion film is transparent, because the resins used in these films originate from very clean sources, such as waste from supermarkets. This allows us to create an – almost – transparent air cushion out of post-consumer waste. The information is printed on each air cushion with a water-based ink, so it's not harmful to the environment.

- Size cushion: WxL = 400x150 mm
- Thickness: 23 micron
- Material: LDPE
- Complies with EN13427 standard for packaging and packaging waste
- Product code: 4081753

## Machine & Accessories

The **MINI PAK'R V3** is a compact and versatile machine producing air cushion on-demand. Compatible with Integrated Systems and a large range of accessories, the machine is the right solution for warehouses and distribution centers with multiple packing tables. Using RFID, the film settings are automatically selected, which make the machine easy to use.

AirSpeed® MINI PAK'R® V3

Renew™ Zero 200x130

- Zero carbon footprint from cradle to gate
- Zero virgin PE
- 100% recyclable

The Renew Zero air cushion is created out of 50% post-consumer recycled (PCR) content and 50% renewable waste and is 100% carbon neutral. For 50%, the air cushion is made from products that have been used by consumers and have been recycled after serving their purpose. The other 50% is created out of renewable waste from plants, such as paper pulp. This ISCC certified source and the production process ensure a carbon neutral product that contributes to a sustainable world and circular economy. Information is printed on each air cushion with a water-based ink, so it's not harmful to the environment.

- Size cushion: WxL = 200x130 mm
- Thickness: 19 micron
- Material: LDPE
- Complies with EN13427 standard for packaging and packaging waste
- Product code: 4082091
